{Penguin} Number Line

* Fun Math Activity or Center *

* PreK/K Level *

at Preschool Powol Packets

Thank you for downloading the Preschool/Kindergarten
Penguin Number Line Set!

I hope you love it!

Please encourage other teachers and parents to visit Preschool
Powol Packets to get their own Penguin Number Line Set too.
This lets me continue to make fun learning packets! Clipart is
from The Organized Plan Book & used with permission.

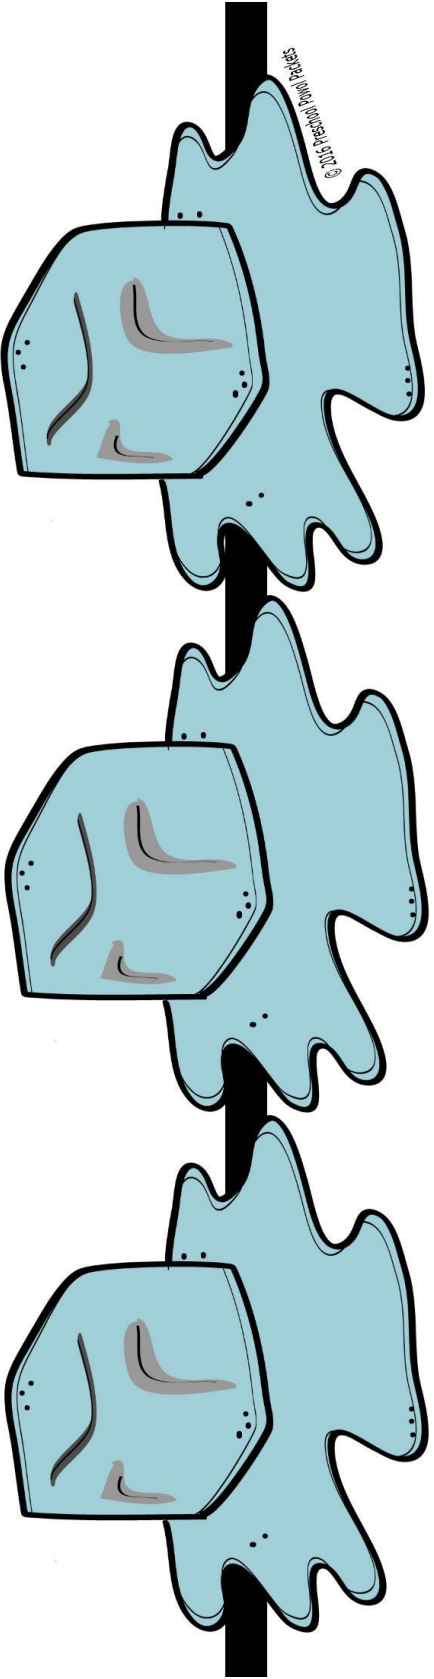

Instructions:

Print as many copies of the ice block page as needed for
whatever skill set you are working on. If you are working on
numbers 1-20, print 7 copies of the page. Trim each page and
tape the lines together to form one coherent line with the
number of ice cubes that you are working on. In this example,
you would want 20 ice cubes on the line. Tape these to the
wall. Print, cut out, and laminate the penguins you need (in this
case, numbers 1-20), and let your kiddos place the penguins in
order on the number line!

You can use this as an individual activity, a group project, a
center rotation, an informal assessment, or anything else you
would like! I would love to hear what you do with it! Feel free
to send me a note at preschoolpackets@gmail.com anytime!

Happy educating,

Carla at Preschool Powol Packets
