# Cut & Paste the Life Cycle

# Life Cycle of a Plant

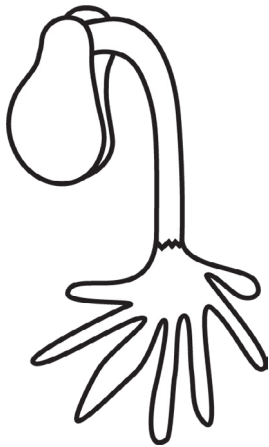

by \_\_\_\_\_

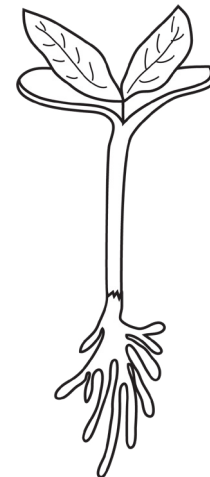

A \_\_\_\_\_ is planted in soil.

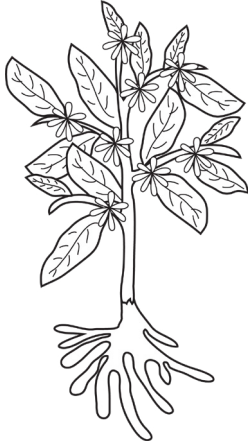

With water and sunlight a \_\_\_\_\_ begins to form.

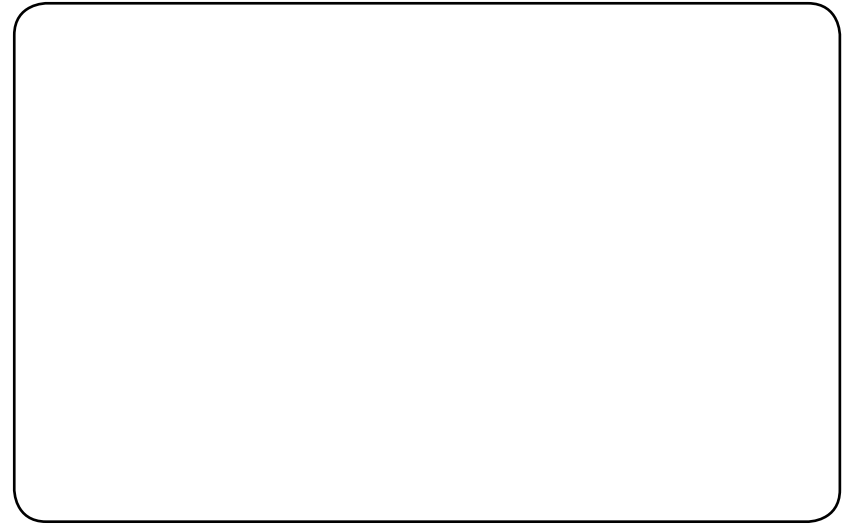

Leaves grow and the plant gets bigger.

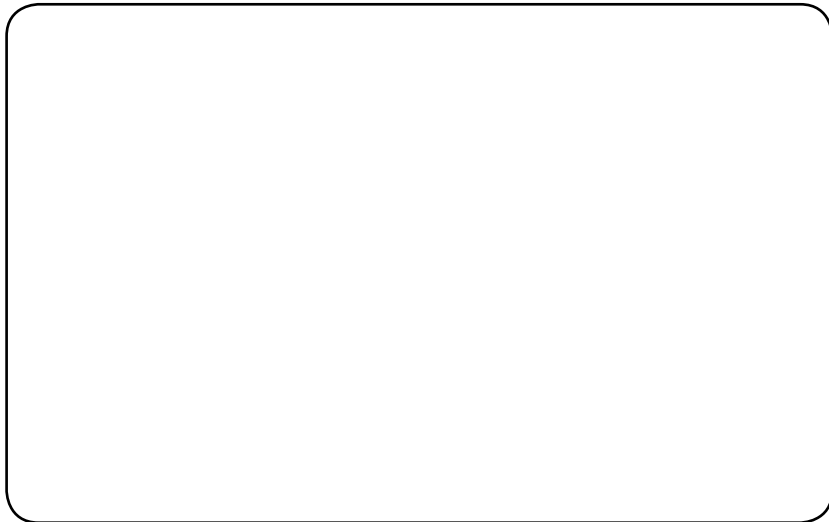

**Soon the plant matures and flowers.**

**My drawing of planting a seed.**

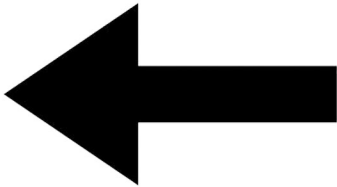

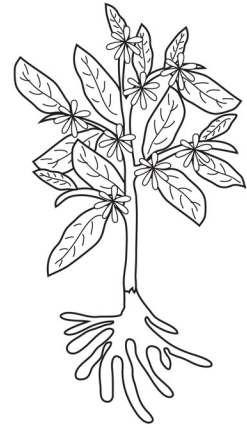

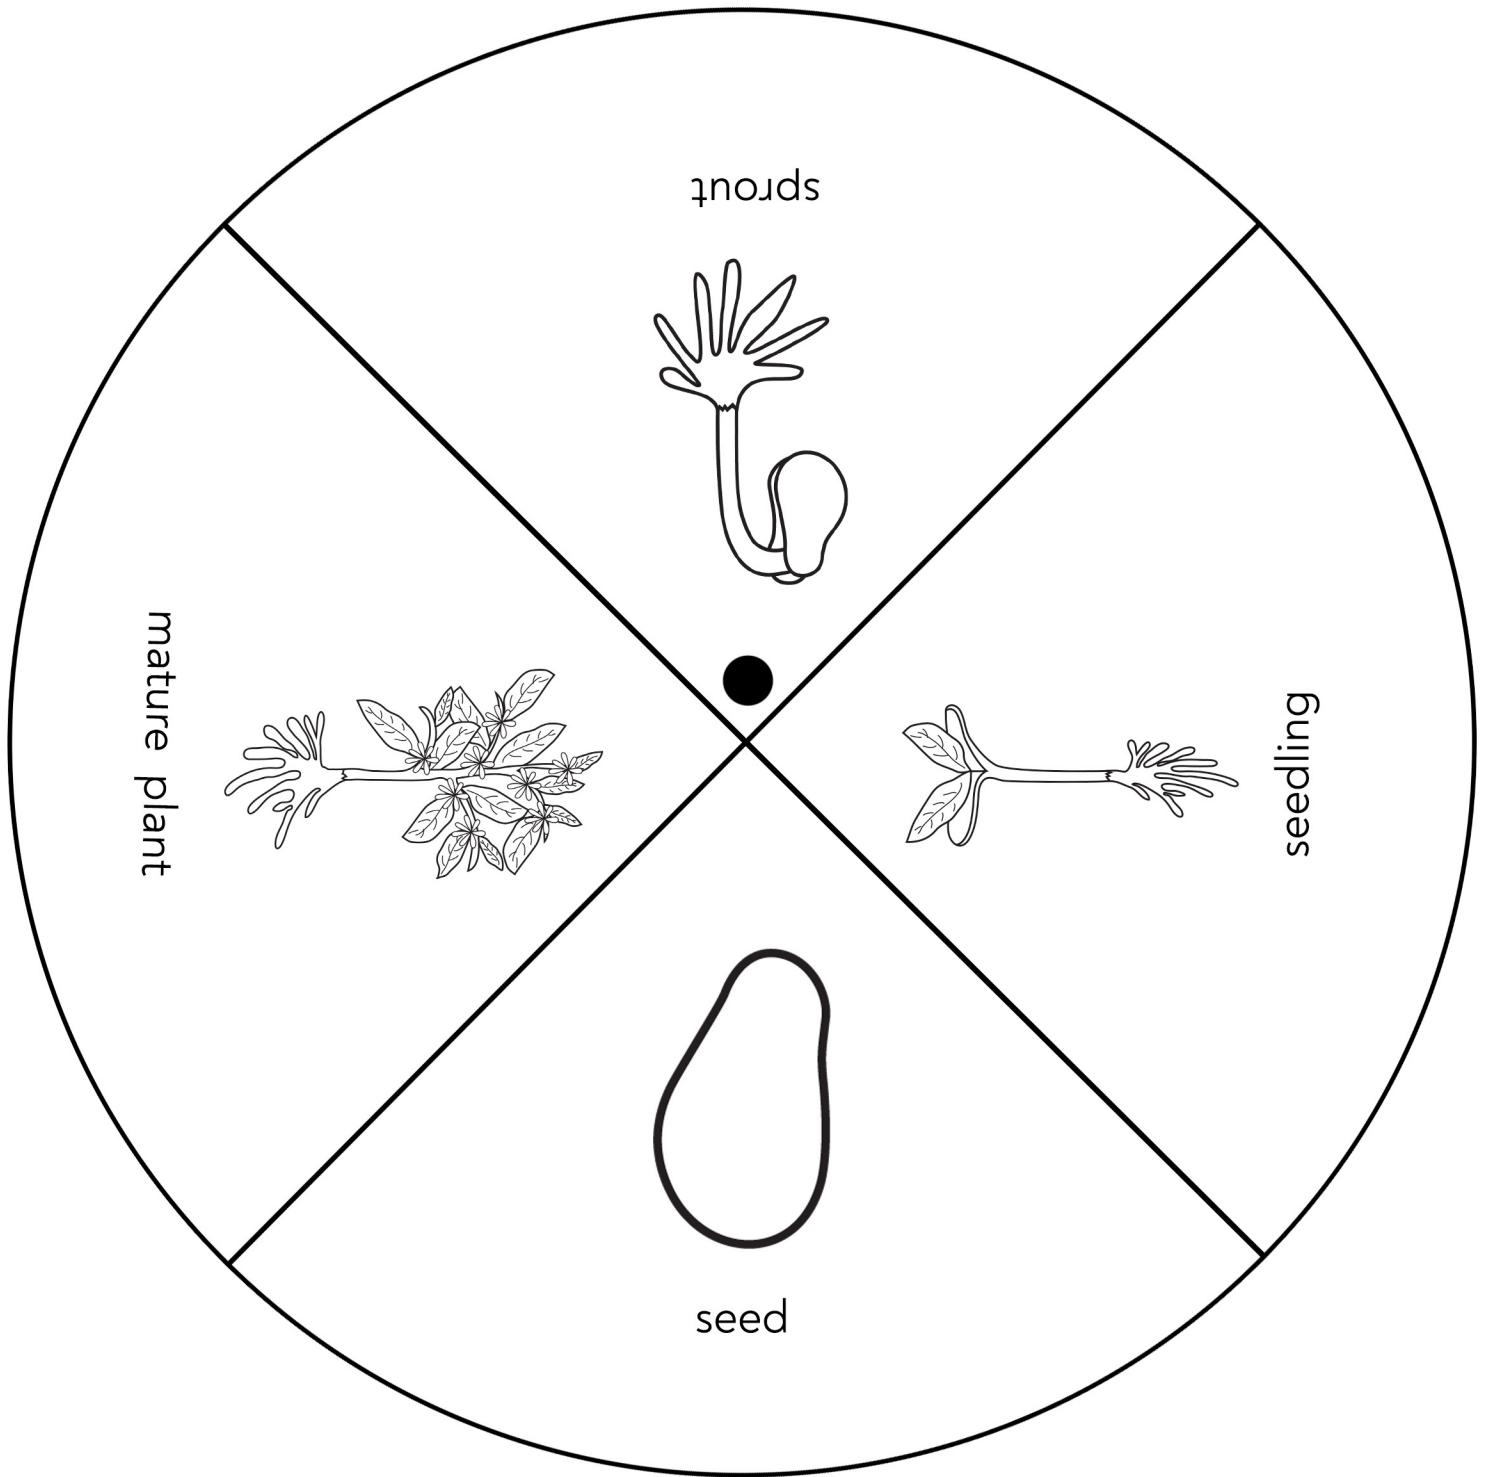

**My drawing of a mature plant.**

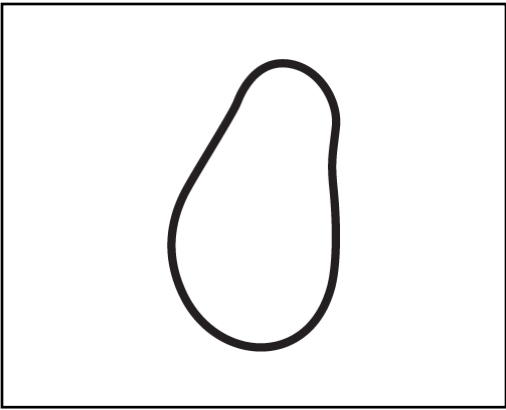

Cut out the top spinner on this page and the bottom spinner on the next page. Attach with a brass paper fastener. Spin and tell the story of the life cycle of the plant.
